

**Great Start Readiness Program
2008 – 2009 Risk Factor Data Report**

October 2009

**Prepared by
High/Scope Educational Research Foundation**

**Prepared for
Michigan Department of Education**

2008 – 2009 Risk Factor Analysis

The information presented in Tables 1 to 6 describe the degree to which children enrolled in the Great Start Readiness Program (GSRP) during the 2008 – 2009 program school year experienced any of the 25 risk factors that made them eligible for the program. The total sample of children in the data set described below is 24,437 children.

Table 1 provides descriptive statistics of 2008 – 2009 enrollment by program and service type. As indicated, the vast majority (84.6%) of children in GSRP attended center-based programs administered by school district/subcontractors.

Table 1: GSRP 2008 – 2009 Enrollment by Program and Service Type (n=24437)

Service Type	Type of Program	
	School District/Subcontract	Competitive Agency
Full-Day	4942 (20.2%)	1108 (4.5%)
All-Day (Alternate)	1098 (4.5%)	237 (1.0%)
Part-Day	14387 (58.9%)	1869 (7.6%)
Home Based	135 (0.6 %)	62 (0.3%)
GSRP-Head Start Blend	260 (1.1%)	339 (1.4%)
Total	20822 (85.2)	3615 (14.8)

Table 2 provides information on the number and percentage of children across demographic categories and program types.

Table 2: Descriptive Statistics of GSRP Children, 2008 – 2009

	Number of Children	Percent of Children
Gender (n=24914)		
Male	12467	50.0
Female	12447	50.0
Race/Ethnicity (n=24844)		
White	15059	60.6
African-American	5616	22.6
Hispanic	2097	8.4
Asian	478	2.0
Native American	136	0.5
Multiracial	1458	5.9
Parent Working Status (n=23602)		
Parent Working	16525	70.0
Parent Not-Working	7077	30.0
GSRP Class Type (n=24978)		
Full-Day	6291	25.2
All-Day (Alternate)	1335	5.3
Part-Day	16556	66.3
Home-Based	197	.8
GSRP-Head Start Blend	599	2.4
GSRP Program Type (n=24504)		
School District/Subcontract	20880	85.2
Competitive Agency	3624	14.8
Average Number of Risk Factors (n=25174)	4.33	
(Standard Deviation)	(2.35)	

Table 3 examines similar demographic and program characteristics as indicated in the previous table but provides data on the average number of risk factors experienced by children in the various categories. In addition to these averages, analyses were conducted to determine if there were significant differences in the average number of risk factors based upon group status. There were statistically significant differences within most of the descriptive categories, the

exception being gender. For example, children served in school district programs tended to experience more risk factors than those served by competitive agencies.

Table 3: Average Number of Risk Factors by Sample Characteristics, 2008 – 2009

	Number of Children	Average Number of Risks (S.D.)
Gender		
Female	12447	4.33 (2.33)
Male	12467	4.35 (2.36)
Race/Ethnicity***		
Asian	478	3.50 (1.54) (A, H, W, M, NA)
African-American	5616	4.11 (2.05) (A, H, W, M, NA)
Hispanic	2097	4.23 (1.99) (A, AA, W, M, NA)
White	15059	4.45 (2.49) (A, AA, H,)
Multiracial	1458	4.48 (2.40) (A, AA, H,)
Native American	136	4.63 (2.59) (A, AA, H,)
Parent Working Status***		
Working	16525	4.13 (2.25)
Not-Working	7077	4.90 (2.50)
GSRP Class Type***		
Full-Day	6291	4.34 (2.16) (All, Part, Home)
All-Day (Alternate)	1335	5.31 (2.98) (Full, Part, Home, Bl)
Part-Day	16556	4.23 (2.31) (Full, All, Home, Bl)
Home-Based	197	3.84 (1.88) (Full, All, Part, Bl)
GSRP-Head Start Blend	599	4.42 (2.66) (All, Part, Home)
GSRP Program Type**		
Competitive Agency	3624	4.22 (2.39)
School District/Subcontract	20880	4.34 (2.33)

Note. ** $p \leq .01$; *** $p \leq .001$

The letters on the right of the corresponding line of the race/ethnicity and class type categories indicate significant differences between groups of children within that category. For example, Asian (A) children had a significantly lower average number of risk factors than African-American (AA), Hispanic (H), White (W), Multiracial (M), and Native American (NA) children.

Additionally, children in home based programs (Home) had fewer risk factors than center-based children (Full, Part, All, and Blend).

Table 4 provides a description of the level of risk experienced by children. As indicated in the table, most of the children experienced 0 to 5 risk factors, making up 76.7% of the population, and 23.3% children experienced more than 5 risk factors.

Table 4: Level of Risk Experienced by GSRP Children, 2008 – 2009 (n=25174)

Number of Risk Factors Reported	Number of Children	Percent of Children	Cumulative Percent
0	69	0.3	0.3
1	178	0.7	1.0
2	5123	20.4	21.4
3	6032	24.0	45.4
4	4601	18.3	63.7
5	3266	13.0	76.7
6	2116	8.4	85.1
7	1343	5.3	90.4
8	925	3.7	94.1
9	562	2.2	96.3
10	355	1.4	97.7
11 or more	604	2.3	100.0

Table 5 provides a breakdown of the prevalence of each risk factor. Risk factors are listed in order of most to least prevalent. As expected, the most frequently reported risk factor was income with over half (69.4%) of children in the program meeting this low income criteria.

Table 5: Risk Factor Prevalence, 2008 – 2009 (n=25174)

Risk Factor	Number of Children	Percent of Children
Low Family Income	17474	69.4
Single Parent	8452	33.6
Nutritionally Deficient	7976	31.7
Housing in Rural or Segregated Area	7789	30.9
Unemployed Parent(s)	6819	27.1
Family History of Low Achievement or Dropout	6263	24.9
Teenage Parent	5087	20.2
Long-term or Chronic Illness	4152	16.5
Chronically Ill Parent/Sibling	4013	15.9
Low Parent/Sibling Education Attainment	3704	14.7
Parent/Sibling Loss by Death or Divorce	3655	14.5
Language Deficiency or Immaturity	3597	14.3
Low Birth Weight	3599	14.3
Lack of a Stable Support System of Residence	3424	13.6
Family History of Diagnosed Family Problems	3410	13.5
Substance Abuse or Addiction	3346	13.3
Limited English Speaking Household	2942	11.7
Family Density	2457	9.8
Developmentally Immature	2075	8.2
Family History of Delinquency	2045	8.1
Incarcerated Parent	1781	7.1
Destructive or Violent Temperament	1729	6.9
Physical and/or Sexual Abuse or Neglect	1444	5.7
Diagnosed Handicapping Condition	1190	4.7
Other	533	2.1

In Table 6, the prevalence of children from low income families as well as families in which parents were unavailable to provide childcare due to employment is detailed by class type. Of particular interest from year to year is the percentage of children who are both low income and have a parent working. The total number of children who fell into this low income/parent working category in 2008 – 2009 was 11,230 – or 61.5% of the total number of children (18,249) for whom data was available on both variables.

Table 6: Low Income and Parent Working by Service Type, 2008 – 2009

Service Type	Low Income Family	Parent Working	Low Income and Parent Working
Full-Day	4257 (67.7%)	3894 (65.4%)	2544 (55.3%)
All-Day (Alternate)	889 (66.6%)	911 (74.5%)	614 (66.3%)
Part-Day	11650 (70.4%)	11012 (71.2%)	7694 (63.3%)
Home-Based	139 (70.6%)	142 (72.4%)	92 (63.0%)
GSRP-Head Start Blend	394 (65.8%)	446 (76.6%)	286 (67.8%)
Total	17329 (69.4%)	16405 (70.0%)	11230 (61.5%)

The data presented in Tables 1 – 6 describe characteristics of all of the children who enrolled in GSRP. Every year, some children who enroll at some point leave the program before the end of the year. Of the 25,174 children in the total reported sample for the 2008-2009 year, 1,775 or 7.1% dropped out of the program. Tables 7 - 10 provide information on those ‘dropout’ children. The basic question is whether or not children who leave the program are different from those who remained enrolled.

Table 7 provides general descriptive information about dropout children. Chi-Square tests were conducted to determine if there were statistically significant differences in the distribution of demographic characteristics between children who remained in the program and those that dropped out. The findings indicate that there are significant differences in race/ethnicity, parent working status, and number of risk factors between the two groups. As indicated in the table, the distribution of race/ethnicity is different between the two groups. For example, there was a higher proportion of Hispanic children and a lower proportion of White

children in the dropout group as compared to the distribution among children who remained in the program. There were also significant differences between parental working status and working parents and low family income for children that dropped out and those who remained in the program.

Table 7: Dropout Rate by Sample characteristics, 2008 – 2009

	Remained in Class		Dropouts	
	%	N	%	N
Gender				
Male	50.0	11582	50.6	885

(standard deviation) N = 25174	4.31		4.58	
	(2.33)		(2.57)	

Note. * $p \leq .05$; ** $p \leq .01$; *** $p \leq .001$

According to Table 7, children who left GSRP had on average more risk factors than those who remained in the program. Tables 8 and 9 examines these findings more closely. Specifically, Table 8 indicates the number of risk factors reported for each group and Table 9 identifies the top 5 risk factors reported for each group and those risk factors for which there are statistically significant differences between the groups.

Table 8: Number of Risk Factors – Those who Remained in Class vs. Dropouts 2008 - 2009

# of Risk Factors	Remained in Class		Dropouts	
	%	Cumulative %	%	Cumulative %
0	0.3	0.3	0.3	0.3
1	0.7	1.0	0.8	1.1
2	20.5	21.5	18.6	19.7
3	24.1	45.6	21.6	41.3
4	18.2	63.8	19.2	60.5
5	13.0	76.8	13.0	73.5
6	8.4	85.2	8.5	82.0
7	5.4	90.6	5.1	87.1
8	3.6	94.2	4.4	91.5
9	2.2	96.4	2.7	94.2
10	1.4	97.8	2.2	96.4
11 or more	2.2	100.0	3.6	100.0

Note. $N = 23399$ for those who remained and 1775 for the dropouts.

Included in Table 9 is the rank order of risk factors for the children who remained enrolled in GSRP for the full year and those who dropped out. As indicated, the top 5 risk factors for the two groups are bolded in the rank column. For example, having a family history of low achievement is a top 5 risk factor for dropouts, but it is not among the top 5 for children who remained in the program. Compared to the students who remained enrolled, the dropouts had significantly higher instances of low family income, single parent, unemployed parent, family history of low achievement, teenage parent, parent/sibling loss by death or divorce, lack

of stable support system, a limited English speaking household and incarcerated parent. Fewer dropout children were reported to suffer from housing in a rural or segregated area, a long-term or chronic illness, having chronically ill parents or siblings, low birth weight, a history of diagnosed family problems, and substance abuse or addiction.

Table 9: Risk Factor Prevalence – Those who Remained in Class vs. Dropouts, 2008 - 2009

Risk Factor	Remained in Class		Dropouts	
	%	Rank	%	Rank

Note. N = 23399 for those who remained and 1775 for the dropouts. * p ≤ .05; ** p ≤ .01; *** p ≤ .001

Table 10 provides information on the average number of risk factors between dropouts and those children that remained in class for each demographic characteristic.

Table 10: Average Number of Risk Factors by Sample Characteristics – Those who Remained in Class vs. Dropouts, 2008 – 2009

		Remained in Class		Dropouts	
		N	Avg. # Risks (sd)	N	Avg. # Risks (sd)
Gender					
	Male	11582	4.33 (2.34)	885	4.60 (2.67)
	Female	11584	4.31 (2.32)	863	4.59 (2.47)
Race/Ethnicity					
	White	14208	4.42 (2.46)	851	4.98 (2.86)
	African American	5093	4.10 (2.04)	523	4.11 (2.10)
	Hispanic	1885	4.22 (1.96)	212	4.30 (2.25)
	Asian	452	3.49 (1.51)	26	3.65 (1.94)
	Native American	125	4.52 (2.57)	11	5.91 (2.55)
	Multiracial	1350	4.45 (2.39)	108	4.82 (2.46)
Parent Working Status					
	Working	15623	4.13 (2.24)	902	4.22 (2.46)
	Not-Working	6323	4.89 (2.49)	754	5.07 (2.63)
GSRP Class Type					
	Full-Day	5828	4.34 (2.17)	463	4.40 (2.25)
	All-Day (Alternate Day)	1265	5.29 (2.95)	70	5.67 (3.52)
	Part-Day	15377	4.20 (2.29)	1179	4.55 (2.56)
	Home-Based	186	3.78 (1.84)	11	4.82 (2.36)
	GSRP-Head Start Blend	562	4.42 (2.69)	37	4.43 (2.23)
GSRP Program Type					
	School District/Subcontract	19404	4.32 (2.31)	1476	4.63 (2.61)
	Competitive Agency	3368	4.22 (2.41)	256	4.22 (2.17)

In order to understand the relationship between dropping out of GSRP, child demographic characteristics and risk factors, a logistic regression analysis was performed and the results are presented in Table 11. Thirty-one predictors were included in the initial analysis – including gender, race, parent working status, each of the 25 risk factors, number of risk factors a child experienced, GSRP class type, and program type. Predictors that were not found to be related to dropping out of GSRP were then excluded in the final model. Variables listed in Table 11 are only those found to be related to dropping out of GSRP.

Specifically, the table provides odds ratios for the predictors included in the final model. The odds ratio compares the odds of dropping out of GSRP if a child has a listed trait compared with a child that does not have that trait, while controlling for the effects of all the other predictors presented in the table. An odds ratio greater than 1 indicates an increase in the odds of dropping out for the child with that specific trait, while an odds ratio less than 1 indicates a decrease in the odds. For example, the odds ratio 1.62 means that children with a lack of social support system have a 62% increase in the odds of dropping out of GSRP as compared to children that do have a social support system. As another example, children living in rural or segregated housing had a 17% reduction in the odds of dropping out of GSRP compared to children not experiencing this risk factor.

Table 11: Variables that Predict Dropping out of GSRP, 2008 – 2009

Variable	Odds Ratio	Significance
Parent not working	1.90	$p < .001$
Lack of social support system	1.62	$p < .001$
Single parent	1.42	$p < .001$
Diagnosed handicapping	1.32	$p < .05$
Family history of low achievement	1.19	$p < .01$
Teenage parents	1.17	$p < .05$
Rural/segregated housing	.83	$p < .01$
Diagnosed family problems	.76	$p < .01$
Long-term illness	.74	$p < .01$
Ethnicity (White as reference)		$p < .001$
Hispanic	1.71	$p < .001$
African American	1.58	$p < .001$
Native American	1.45	--
Multiracial	1.16	--
Asian	.99	--
Type of service (Full-day as reference)		$p < .001$
Part-Day	1.38	$p < .01$
All-Day (alternate day)	1.20	--
Home based	1.06	--
GSRP-Head Start Blend	.94	--
Type of program (School vs. Competitive)	1.16	$p = .05$

Note. $N = 25174$; Variance explained = 4.9%.

This report concludes with Table 12. In this last table, the total number of children in the dataset for each district is reported along with the percentages of those children that are male or female, and the race/ethnicity of those children.

Table 12: Gender and Ethnicity for GSRP Program by District, 2008-2009
